Washington, DC 20554

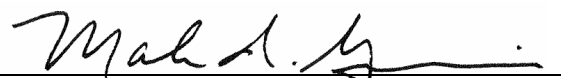

**Re: Ex Parte Discussion** (WT Docket No. 02-146)

Dear Ms. Dortch

Yesterday several parties interested in deploying radios in the 70/80 GHz band met with officials from the Office of Engineering and Technology and the Wireless Telecommunications Bureau. The Commission was represented by Julius Knapp, Jim Schlichting, Mike Marcus, Sandra Danner, and Jennifer Burton. The private participants were Doug Lockie of Endwave, Tom Rosa of Terabeam, John Lovberg of Loea, Chris Hardy of Comsearch, Dave Stephenson of Cisco, Russel Fox of Mintz, Levin, Tom Cohen of The KDW Group, and yours truly. During the meeting, we discussed a number of details of the Commission's Report and Order in this proceeding (FCC 03-248), and encouraged the Commission to make some changes to the coordination/registration process, the channelization and loading requirements, and some of the technical specifications that are or should be in the service rules. The substance of our presentation is captured in the slides being filed with this letter, copies of which were distributed at the meeting.

I am disclosing this presentation pursuant to section 1.1206(b). Any questions about the presentation should be directed to the undersigned.

Respectfully submitted,

  
Mark A. Grannis
